# Welcome To Fancy Template Documentation.

Firstly, a huge thanks for purchasing this Template, your support is truly appreciated!

This document covers the installation and use of this theme and often reveals answers to common problems and issues - read this document thoroughly if you are experiencing any difficulties. If you have any questions that are beyond the scope of this document, feel free to [Open a Support Ticket](#)

Installing Template.

After unzip the download pack, you'll found a Template Folder with all the files.

1. You can view this Template in any browser, you can display or edit the Template without an internet connection.

2. Now go to your cpanel or open your FTP Client (like Filezilla) and upload the content of the Template on your server root.

3. Once the files are done uploading go to www.yourdomainname.com/index.html

Configuring Contact Form

open `contact.php` file from **assets** folder of template and configure mailer function and email address parameters to get it worked.

```
<!-- Replace You Email Here -->

$recipient = "email@gmail.com";
```

Changing Default Color

As its default color is **#3763EB** find out all **#3763EB** open **assets->css>main.css** file and replace it with your own color code, to change the color preset

Changing Font Family

```
body {
 font-family: poppins, sans-serif;
 font-weight: 400;
}

h1, h2, h3, h4, h5, h6 {
    font-family: poppins, sans-serif;
    font-weight: 700;
}
```

To change the font-family you have to change the current **font-family** property with your own **font-family (from main.css file)**. But, make sure you have including the font before on header (using CSS link) or on CSS (using import)
